

AI Automation as a Service (AaaS)

Transforming Businesses with Intelligent Automation

About Nerve Cells AI

Nerve Cells AI Pvt. Ltd. is a technology company specialising in Embedded Systems Engineering, RF Communication Technologies, and Electronic Product Development. Founded in January 2023, we combine deep engineering expertise with product-focused thinking to design and develop advanced electronics systems for global industries.

Our team works on custom hardware design, embedded firmware, RF communication systems, and intelligent devices, enabling organisations to transform innovative ideas into reliable electronic products.

Our Mission & Vision

Our Mission

To create impactful, secure, future-ready technologies that empower industries and improve lives.

Our Vision

To empower people through intelligent technology and shape a future without limits.

Our Core Values

At Nerve Cells AI, our culture is driven by innovation, transparency, and measurable impact.

Innovation & Continuous Learning

We constantly explore new technologies and engineering approaches to deliver impactful solutions.

Collaboration with Transparency

We believe in strong partnerships with clients whilst maintaining honesty and transparency in every engagement.

Social Impact

Technology should contribute positively to society and create sustainable value.

Results-Oriented Execution

Our focus is on delivering measurable results and real engineering outcomes.

Passion for Technology

Our team is driven by a deep passion for electronics engineering and advanced technologies.

Who We Are

End-to-End Software Development Expertise

- 1 Technology-driven company specializing in AI and Automation..
- 2 Focused on building scalable, secure, and intelligent solutions.
- 3 Delivering end-to-end automation systems for modern businesses.
- 4 Strong expertise in AI integrations, workflow automation & system design.

The Problem We Solve

Your Technology Partner

Businesses rely heavily on manual and repetitive processes

Teams spend time on low-value operational work

Lack of integration between tools and systems

Leads are lost due to slow or inconsistent follow-ups

Inefficient data usage and no centralized intelligence

Our Solution– AaaS (Automation as a Service)

We design, build, and manage intelligent automation systems for your business.)

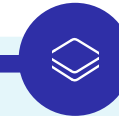

Replace manual work with AI-powered workflows

Automate sales, marketing, HR, and operations

Build systems that work 24/7 without human intervention

Deliver custom solutions tailored to your workflows

What We Automate

- 1 Lead Generation & Qualification
- 2 Sales Follow-ups & CRM Updates
- 3 Customer Support & Engagement
- 4 HR & Recruitment Processes
- 5 Internal Operations & Reporting
- 6 Marketing Campaigns & Outreach

Core Capabilities

- 1 End-to-end workflow automation
- 2 AI-powered decision-making systems
- 3 Multi-platform integrations
- 4 Real-time data synchronization
- 5 Scalable automation architecture
- 6 Custom AI agent development

Workflow Automation Systems

We design, build, and manage intelligent automation systems for your business.)

Build automation using platforms like

n8n, Make.com, Zapier

Connect tools like

CRM, Google Sheets,
Airtable, APIs

Automate

Notifications, task flows,
approvals, reporting

Automation Use Cases & Execution

What we actually do

Lead capture → response →
qualification → follow-ups

Outreach across WhatsApp,
LinkedIn & Email

AI voice calls for engagement
& reminders

Internal workflows (task
routing, reporting, approvals)

System Integration & Connectivity

How everything works together

CRM, Sheets, Airtable, APIs

Real-time data syncing

Unified workflows across tools

No manual data transfer

Business Impact

What This Means for Your Business

70–90%
reduction in
manual work

Faster response
time to leads

Improved
conversion rates

Lower operational overhead

24/7 automated operations

Company Snapshot

Founded

2023

Team

13+ engineers

Headquarters

Mohali, Punjab, India
